Introduction to the National Formulary of Unani Medicine

The National Formulary of Unani Medicine (NFUM) was first developed under the auspices of the Ministry of AYUSH, Government of India, with the objective of establishing a standardized reference for Unani drugs. It encompasses detailed formulations, pharmacopoeial standards, and guidelines for the quality control of raw drugs and finished medicines. The formulary is a dynamic document, periodically updated to incorporate new research findings, technological advances, and feedback from practitioners.

Unani medicine, rooted in the teachings of Hippocrates and Galen, emphasizes a holistic approach to health and disease, based on balancing the four humors: blood, phlegm, yellow bile, and black bile. The formulary aligns with this philosophy but also emphasizes scientific validation and safety, making it an essential tool for ensuring consistency across different practitioners and manufacturers.

Historical Background and Development

Unani medicine's origins trace back to ancient Greece, but it flourished in the Islamic world and later in South Asia, especially India. Recognizing the need for standardization, the Indian government established the Central Council for Research in Unani Medicine (CCRUM) in 1979, which spearheaded the development of the NFUM. The first edition was published in 2000, and subsequent revisions have expanded and refined the content to include new formulations, pharmacological data, and quality standards. The formulary was developed through collaboration between traditional Unani scholars, pharmacologists, and regulatory authorities, ensuring that it maintains the integrity of traditional practices while adhering to scientific principles.
